

General Guideline

IFN647- Assignment 2 Deliverables

Please note that this is a general guideline for you to prepare your deliverables. This is only a supportive document, and you have your own freedom to prepare your deliverables refer to the Assignment specification and the marking guide uploaded in Canvas.

Poster and the Demonstration

All group members must present.

Total time allocated for group: 10 mins

Demonstration (8 Minutes)

- Poster (Introduction + models + results + conclusion + contribution)-1-2 mints
- System Execution – 5-6 minutes (We expect at least 90% of the completed functionality in your system. Ideally it should be 100%)

You suppose to execute your system and demonstrate all three modules, their results, and findings. You can spend a few minutes to give and overview about the two models you developed.

Question & Answering (2 mints)

- Individual contribution/individual questions

Please setup your system before your demonstration.

Contents of the Poster

Visualize your system by highlighting the following points:

- Introduction to system
- Your Approach and the Models
- Results and Evaluation
- Key Findings
- Contributions (if any)

You need to graphically visualize these points and refer some poster template. You can use the following link to get some idea:
